If Ingested	<ul style="list-style-type: none">• Clean mouth with water.• Drink plenty of water afterwards.
Call a poison control center or doctor for further treatment advice. Have the product container or label with you when calling a poison control center or doctor, or going for treatment. For emergencies dial InfoTrac at 800-535-5053.	

General Use Information

Boron-10% is a high concentration liquid boron micronutrient for soil application for the correction of boron deficiency. Boron-10% will not correct other deficiencies and so it is important to test for other nutrients and ensure adequate Nitrogen (N), Phosphorous (P) and Potash (K₂O) prior to application. Boron-10% may be applied

by ground, irrigation, and aerial and may be tank mixed with compatible pesticides or other nutrients. Always check for compatibility.

DIRECTIONS FOR USE

Consult your agriculture specialist such as state extension officer prior to making a micronutrient application. Under application and continued deficiency may result in reduced yield, but over application may result in phytotoxicity.

Notice: The use of the this product on any crops other than those recommended by the agriculture specialist may result in serious injury to the crops.

MIXING RECOMMENDATIONS

Soil Application: Apply 2-12 quarts of MAXUP Boron-10% per acre in starter fertilizer blend. Rate will depend on soil deficiency.

Foliar Application: Typical application is 1-4 quarts per acre. A wetting agent is recommended to facilitate complete wetting and improve plant uptake of micronutrient efficiency. Wait at least 2 weeks to apply a second application.
